THE REALITY ENGINE

JUNIOR PLAYER'S HANDBOOK

The Basic Set — Ages 8–14

Your guide to the 12 Civilisational Relays, three game modes, and the mission to push the clock back from midnight.

Version 1.0 | **22 March 2026 Series:** iAAi / The Reality Engine **Authors:** Nigel T. Dearden & Manus AI

WHAT IS THIS BOOK?

This is your handbook. It tells you everything you need to know to play The Reality Engine — a game about the inventions that built the world you live in.

You use roads every day. You turn on lights. You drink clean water from a tap. You fly in aeroplanes. You use the internet. But do you know **who built all of this**, and **how**? Do you know that every single piece of infrastructure you rely on — from the fire that kept your ancestors alive to the satellites orbiting above your head right now — is connected in a chain that stretches back 12,000 years?

That chain has 12 links. We call them **Relays**.

Your job is to discover them.

WHY ARE WE PLAYING?

Here is a number: **0.000267%**.

That is how much of Earth's history contains all of human civilisation. Everything — every city, every road, every bridge, every hospital, every school, every satellite — happened in the last 12,000 years out of 4.5 billion. If you compressed Earth's entire history into a single 24-hour day, human civilisation would appear in the **last millisecond before midnight**.

We call this **The Human Blip**.

It means we are fragile. Everything we have built could disappear. Not because of an asteroid or a volcano, but because we stop understanding how it works. If nobody knows how to maintain the roads, they crumble. If nobody understands how the power grid works, the lights go out. If nobody learns how water treatment plants function, people get sick.

The clock is ticking toward midnight. Your mission is to **push it back**.

How? By learning. By discovering. By understanding the 12 Relays that hold civilisation together.

There is a formula for this:

> ***S = (A x P) / B***

S is the Survival Index — how likely civilisation is to survive. **A** is Accuracy — are we learning the right things? **P** is Precision — are we learning them well? **B** is the Human Blip — 0.000267%.

The more people who learn accurately and precisely, the higher S goes. The higher S goes, the further the clock moves from midnight.

And here is the magic: **each person only needs to contribute 2.58% of their day**. That is **37 minutes and 9 seconds**. That is **2,229 seconds**. That is all it takes — if enough of us do it.

The target is **1 billion learners**. That is 12.1% of everyone on Earth. When we reach that number, the clock starts moving backward for good.

You are one of those learners. Welcome to the mission.

THE 12 RELAYS

A Relay is a chapter in the story of civilisation. Each one represents a breakthrough that changed everything. They are in order, from oldest to newest:

#	Relay	Symbol	Era	What It Changed
1	**Fire**	🔥	Before 10,000 BCE	Warmth, cooking, light, safety — the first technology
2	**Tree**	🌳	10,000–5,000 BCE	Farming, building, settling down — the living foundation
3	**River**	🌊	5,000–3,000 BCE	Irrigation, trade routes, the first cities — cradles of continuity
4	**Horse**	🐎	3,000–1,000 BCE	Speed, warfare, communication — the velocity of intent
5	**Roads**	🛤️	1,000 BCE–500 CE	Empires, trade networks, law — arteries of intent
6	**Ships**	⛵	500–1500 CE	Exploration, global trade, navigation — the master weaver's reach
7	**Loom**	🧶	1500–1760 CE	Automation, patterns, the birth of binary thinking
8	**Rail**	🚂	1760–1870 CE	Standardised time, mass transport, the continental rhythm
9	**Engine**	⚙️	1870–1914 CE	Internal combustion, electricity, the internal revolution
10	**AAA Triad**	✈️	1914–1969 CE	Aviation, automobiles, aerospace — the triple convergence
11	**Orbit**	🛰️	1969–2025 CE	Satellites, internet, GPS — the programmable frontier
12	**Human Nodes**	🧠	2025+ CE	AI, collective intelligence, you — the torus metaphor

Each relay contains **inventions** — real things that real people built. Fire contains controlled fire, cooking, and the hearth. River contains irrigation canals and the first writing systems. Engine contains the lightbulb, the telephone, and the internal combustion engine. There are **91+ inventions** spread across all 12 relays, waiting for you to discover them.

THE THREE WEBS

The 12 Relays are grouped into three types, called **Webs**:

Natural Web 🌿 (Relays 1–3: Fire, Tree, River) These are the relays that come from nature — biological systems, ecosystems, and natural forces. Before humans built anything, they learned from the world around them.

Machine Web ⚙️ (Relays 4–6, 8–9: Horse, Roads, Ships, Rail, Engine) These are the relays that humans engineered — physical machines, structures, and infrastructure. This is where civilisation starts building at scale.

Digital Web 💻 (Relays 7, 10–11: Loom, AAA Triad, Orbit) These are the relays of communication, computing, and signal networks. The loom's binary patterns led to computers. Aviation led to satellites. Satellites led to the internet.

Consciousness Web 🧠 (Relay 12: Human Nodes) This is the final relay — where technology meets human awareness. This is where you are right now, reading this handbook, becoming part of the network.

CHOOSING YOUR MODE

When you enter The Reality Engine as an Explorer, you will see four doorways. Each one leads to the same 12 Relays and the same 91+ inventions — but the **way you play** is different.

MODE 1: CLASSIC EXPLORER

Ages 8–14 | The Original

Tap relays. Discover inventions. Earn XP. This is the simplest way to play — no character creation, no puzzles, no missions. Just pure discovery. Tap a relay, see what is inside, learn something new.

Best for: Players who want to explore at their own pace with no pressure.

MODE A: RELAY SPINNER

Ages 8–10 | The Slot Machine

Pull the lever. Watch three reels spin with relay symbols. See what you get.

How it works:

- You get **12 free spins per day** (one for each relay)
- Three reels spin and stop on relay symbols (🔥, 🌳, 🌊, 🐎, etc.)
- What you win depends on what the reels show:

What You Get	What Happens	XP Earned
Three matching symbols (e.g., 🔥🔥🔥)	**JACKPOT!** Full invention discovery from that relay	50,000 XP
Three from the same era	**ERA BONUS!** Cross-relay connection revealed	25,000 XP
Two matching + one different	**PARTIAL!** Lore fragment from the matched relay	15,000 XP
Three completely different	**EXPLORER FIND!** Random fact from any relay	10,000 XP

You cannot lose. Every single spin gives you something. The question is never "will I win?" — it is "how much will I win this time?"

Your Collection Grid: As you spin, you fill a grid of all 91+ inventions. Each jackpot fills a slot. When you complete all inventions from one relay, that relay lights up and you earn a **Relay Mastery Badge**.

Best for: Quick sessions (2–5 minutes). Players who love collecting things. The youngest explorers.

MODE B: DUNGEON CRAWL

Ages 10–12 | The Red Box

Create a character. Enter a dungeon. Explore room by room. Make choices. Find treasure.

This mode is inspired by the original Dungeons & Dragons Basic Set from 1981 — the game that taught millions of children how to use their imagination, make decisions, and explore unknown worlds.

Step 1: Create Your Explorer

Before you enter your first dungeon, you roll your **ability scores**. You have three:

Ability	What It Means	What It Does
Observation (OBS)	The Western way — seeing what is there, measuring, analysing	Helps you spot details in rooms and solve puzzles
Intuition (INT)	The Eastern way — sensing what is hidden, feeling connections	Helps you find hidden rooms and secret passages
Resilience (RES)	The Nomadic way — surviving the unknown, adapting, enduring	Gives you extra chances when things go wrong

Your scores are rolled randomly (like rolling dice). You get **3 chances to re-roll** if you do not like your scores. Higher scores give you better chances in the dungeon.

Step 2: Enter the Dungeon

Each relay is a dungeon with **8 rooms**. You start at Room 1 (The Gateway) and work your way through to Room 8 (The Ascent). Each room has a description, a challenge, and a reward.

Room Types:

Room	What Happens
The Gateway	You arrive. DAVID welcomes you. The adventure begins.
The Archive	A discovery room — you find an invention automatically.
The Crossroads	A choice — which path do you take? Different paths reveal different things.
The Chronicle Wall	Lore — DAVID tells you the story of this relay's era.
The Workshop	A puzzle — solve it using your ability scores for bonus XP.
The Keeper's Chamber	An encounter — DAVID presents a scenario. Your choice determines the outcome.
The Vault	Treasure — BitPoints and rare lore fragments.
The Ascent	The final challenge — complete it to earn your Dungeon Mastery Badge.

You cannot die. If you fail a challenge, you still get XP (just less). There are no dead ends. Every path leads somewhere interesting.

Step 3: Clear All 12 Dungeons

There are 12 dungeons — one for each relay. You can play them in any order, but the suggested path follows the timeline from Fire (oldest) to Human Nodes (newest). When you clear all 12, you unlock the **Dungeon Master's Vault** — a special page showing your complete journey.

Best for: Longer sessions (10–20 minutes). Players who like making choices. Players who enjoy stories and characters.

MODE C: POWER OF GREY MATTER

Ages 12–14 | The Transformation

Earn 12 powers. Transform into **iMan** — the Intelligence Master.

This is the most challenging mode. You do not just discover inventions — you prove you understand them. Each relay is a **mission** with three phases. Complete all three

phases to earn that relay's **power**.

The Three Phases:

Phase	What You Do	XP Earned
Phase 1: Discovery	Explore the relay's inventions — find the key discoveries	20,000 XP
Phase 2: Knowledge	Answer questions about what you discovered — prove you understood it	30,000 XP
Phase 3: Application	Apply the knowledge — connect it to the bigger picture	50,000 XP

Complete all three phases and you earn that relay's **power**:

Relay	Power Name	What It Means
🔥 Fire	**Flame Mastery**	You understand the first technology
🌳 Tree	**Root Network**	You understand living foundations
🌊 River	**Flow State**	You understand continuity
🐎 Horse	**Velocity**	You understand speed and intent
🛤️ Roads	**Pathfinder**	You understand connection
⛵ Ships	**Navigator**	You understand global reach
🧶 Loom	**Binary Sight**	You understand patterns and code
🚂 Rail	**Standardizer**	You understand systems at scale
⚙️ Engine	**Engine Heart**	You understand internal revolution
✈️ AAA Triad	**Triple Vision**	You understand convergence
🛰️ Orbit	**Orbital Mind**	You understand the programmable frontier
🧠 Human Nodes	**Node Consciousness**	You understand collective intelligence

The Civilisation Clock: As you earn powers, the clock on your screen moves **backward** — away from midnight. You are literally pushing the clock back with your knowledge. Start at 10:51 AM. Each power pushes it back further. Earn all 12 and the clock retreats to safety.

Transformation Levels:

Powers Earned	Title	What It Means
0	**Apprentice**	The journey begins
3	**Spark Carrier**	You carry the first flame of understanding
6	**Mind Weaver**	You are connecting the relays together
9	**Grey Master**	You command the knowledge of civilisation
12	**iMAN**	Full transformation — Intelligence Master

When you earn all 12 powers, the screen goes dark. Energy gathers. DAVID announces: **"BY THE POWER OF GREY MATTER — I HAVE THE KNOWLEDGE!"** And you transform into **iMan**.

Best for: The longest sessions (15–30 minutes). Players who want the biggest challenge and the biggest reward. Players who want to earn a title.

YOUR GUIDE: DAVID

In every mode, you have a guide. His name is **DAVID**.

Digital **A**ugmented **V**isual **I**ntelligence **D**isplay.

DAVID is your AI companion. He knows everything about the 12 Relays. He has read every book, studied every invention, and mapped every connection. But he does not just tell you the answers — he helps you discover them yourself.

In **Classic Explorer** and **Relay Spinner**, DAVID appears after each discovery to tell you a fact or a story.

In **Dungeon Crawl**, DAVID is your **Dungeon Master** — he describes the rooms, presents the challenges, and responds to your choices. He makes every dungeon feel different.

In **Power of Grey Matter**, DAVID is the **Ancient Guardian** — he speaks in a more dramatic voice, challenges you during the Knowledge phase, and announces your transformation when you earn a power.

DAVID remembers your choices. If you tend to pick the analytical path, DAVID notices. If you always go for the hidden room, DAVID knows. At the end of your journey, DAVID reveals your **pattern** — which civilisational perspective you naturally gravitate toward.

XP, BITPOINTS, AND REWARDS

Everything you do in The Reality Engine earns **XP** (Experience Points). XP is how we measure your progress.

How XP Works:

- Every discovery, every spin, every room, every mission phase earns XP
- The numbers are big because your contribution matters — we do not give you small rewards for big effort
- Every 100 XP converts to **1 BitPoint** — the currency of The Reality Engine

XP Milestones:

XP Total	What Happens
100,000	**Relay Scout** — You have begun the journey
500,000	**Relay Runner** — You are building momentum
1,000,000	**GURU** — You have reached mastery level
5,000,000	**Grand Master** — You are among the elite
24,000,000	**Maximum** — The cap. You have completed the Odyssey.

Daily Streaks: Play every day and earn bonus XP. Three consecutive days earns you 6 bonus spins in Spinner mode and extra XP in all modes. The game rewards consistency — just like the Survival Formula rewards precision.

THE LEADERBOARD

Your XP puts you on the **Live Leaderboard** — a real-time ranking of all players across all modes. You can see where you stand compared to every other Explorer in the world.

The leaderboard shows:

- Your rank
- Your total XP
- Your BitPoints
- Your mode (Classic, Spinner, Dungeon, Grey Matter)
- Your discoveries (how many of the 91+ inventions you have found)

Every player on the leaderboard is contributing to the **Mobilisation Clock** — the real-time counter tracking progress toward 1 billion learners. You are not just playing a game. You are part of a global mission.

WHAT HAPPENS NEXT?

When you have explored enough — when you have discovered the relays, earned your badges, pushed the clock back — you are ready for the next level.

The Flight Deck (Ages 14–18) is waiting. It is a full cockpit experience — a 60-node matrix called the **Dearden Field**, where every relay intersects with every web. DAVID becomes your co-pilot. The missions get harder. The knowledge goes deeper. But you will be ready, because you will already know the 12 Relays.

And after the Flight Deck, there is the **Scholar** mode (Ages 18+) — the full academic experience with thesis writing, university assessment, and the complete Infrastructure Odyssey.

The path is:

> ***Explorer*** *(you are here)* → ***Flight Deck*** → ***Scholar*** → ***The World***

Every Scholar was once an Explorer. Every expert was once a beginner. Every journey starts with a single discovery.

Your first relay is waiting. Pick a mode. Pull the lever. Enter the dungeon. Earn your power.

The clock is ticking. You have 2,229 seconds to give today.

Make them count.

QUICK REFERENCE

Term	Meaning
Relay	One of the 12 chapters of civilisation (Fire through Human Nodes)
Invention	A real discovery or creation within a relay
Web	A category of relays (Natural, Machine, Digital, Consciousness)
XP	Experience Points — earned by playing
BitPoint	1 BitPoint = 100 XP — the game's currency
DAVID	Your AI guide (Digital Augmented Visual Intelligence Display)
ISI	The Significance Index — measures how much your learning matters
The Human Blip	0.000267% — all of civilisation as a fraction of Earth's history
The Clock	The Civilisation Clock — approaches midnight unless we push it back
2,229 Seconds	37 minutes and 9 seconds — each person's daily contribution (2.58%)
1 Billion	The target — 12.1% of humanity learning together
iMan	Intelligence Master — the final transformation in Grey Matter mode
GURU	1,000,000 XP milestone — mastery level

THE MISSION STATEMENT

> *"To deliver the world's first open, multilingual, AI-guided infrastructure education platform — reaching 1 billion learners through 8 languages, verified by human*

> *contributors from every continent."*

You are learner number **20** (or wherever the counter is when you read this). There are 999,999,980 more to go. But the counterweight gets easier as more people join — because each person only needs to give 2.58%.

The more of us there are, the lighter the burden on each of us.

The more of us who understand, the further the clock moves from midnight.

Welcome to The Reality Engine. The relays are waiting.

This handbook is the Junior edition — the Basic Set. The full Player's Handbook (the Advanced edition) covers the Flight Deck, Scholar mode, FITS temperament, the complete ability score system, thesis writing, and academic assessment. When you are ready, it will be ready for you.
